### ***Mastertech Diamond Products Company Earns ISO 9001:2015 Certification***

**Mentor, OH: October 09, 2017 – Mastertech Diamond Products Company is proud to announce after a year-long accreditation process, it has recently earned its registration as an ISO 9001:2015 certified company. By meeting the extensive criteria for these standards, the company affirms its ability to consistently deliver effective quality management systems and drive continuous improvements to products, services, and internal processes.**

**The International Organization for Standardization (ISO) is the internationally recognized quality management standard covering all main processes within a company, ensuring that these processes are not only conducted under controlled conditions, but are also subject to continuous improvement. The ISO 9001:2015 certification is earned when a company demonstrates it meets the requirements for a quality management system (QMS). The certificate is only awarded to companies that can demonstrate a commitment to a number of quality management principles including a strong customer focus, the motivation and implication of top management, the process approach, and continual improvement. Surveillance audits must be performed once per year to maintain an ISO 9001:2015 certification.**

**“We are excited to have earned our (ISO 9001:2015) certification which strengthens our commitment to customers that they will receive the highest quality products and services to meet their unique tooling requirements,” says Mastertech Diamond President, Thomas Frakes.**

#### **About Mastertech Diamond Products Company**

**Mastertech Diamond manufactures and distributes custom diamond tooling including polycrystalline cubic boron nitride (PCBN) and polycrystalline diamond (PCD) cutting and rotary tools, as well as standard and specialized cutting inserts and cartridges.
